## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 29 is objected to because of the following informalities:

The term "the first three-dimensional position" in claim 29 should be changed to -- the first multi-dimensional position -- so as to be consistent with the antecedent "a first multi-dimensional position" as recited in claim 14.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. Claims 14 and 16-21, 23 and 28-30 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the medium being adapted to emit light. The examiner notes that absent some antecedent limitation (in claim 14) that the medium be adapted to emit light, it is unclear how the plurality of photodetectors (i.e., light detectors) may be adapted to determine a first multidimensional position of the interaction. The examiner further notes that while emission of light could be considered an implied limitation of the of the apparatus, the positive recitation of an adaptation to emit light as recited in dependent claim 15 raises the question of whether of not claim 15 is redundant or not further limiting.

The remaining claims are rejected on the basis of their dependency.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible

Art Unit: 2878

harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-45 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of copending Application No. 10/192,614. Although the conflicting claims are not identical, they are not patentably distinct from each other for the reasons noted below

Regarding claims 1-24, it would have been obvious to a person of ordinary skill in the art to alter the wording of the claims (particularly changing the limitation of three-dimensional to multi-dimensional) so as to generate new claims differing in scope.

Regarding claim 25-45, it would have been obvious to a person of ordinary skill in the art to include specific steps or limitations relating to different species of the invention wherein the multi-dimensional position determination is made on the basis of spatial distribution and/or

Art Unit: 2878

arrival times of the light and/or ionization electrons at the respective detecting and/or collecting means so as to generate new claims differing in scope and to more clearly define the invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
